Failure to close a permit or obtain a formal extension from the City within 3 years of permit being issued	\$215

Note:

- Permits for new single-family and two-family dwellings, detached secondary suites and additions, the number of inspections included in a project would be 7 (3 for building, 2 for plumbing, and 2 for electrical if applicable to the construction project). Since most of the required inspection points can be combined to include more than one permit, the inspections can be 'transferred' between permits on these projects. However, for many interior renovation projects or accessory structure (external to the house) projects which might include more than one permit (e.g. a garage with a building and electrical permit), the inspections would not be transferable because each electrical or plumbing contractor will typically call for inspections independently.
- There are two inspections in total per flood proofing permit package.

- Inspections calculated on the basis of time spent attending to the inspection;
- Fees that are only calculated after the application has been reviewed or the permit has been issued such as additional inspection fees, fees for non-compliance, certain deposits etc.;

The Director is authorized to charge fees and charge for services provided, documents produced, permits issued or other actions taken that are not referred to in the Schedule. Increased fees refunded by the Director

The Director is authorized to refund an amount equal to the increase in the fee to the applicant where:

- (a) a new fee is imposed a permit fee higher than the regular fee is imposed, or an amendment to the fee schedule results in an increased permit fee; and
- (b) the Director is satisfied that, prior to notice being provided to the construction industry of the date that the increased permit fees would come into effect, an applicant was bound to a contract predicated on payment of the lower fee for the permit.

Refunds or waiver of fees by Standing Policy Committee
