Minutes – Standing Policy Committee on Finance – May 10, 2022

REPORTS

Item No. 3 North End Sewage Treatment Plant NEWPCC Upgrade Projects Power Supply and Headworks

STANDING COMMITTEE DECISION:

The Standing Policy Committee on Finance concurred in the recommendation of the Winnipeg Public Service and received the financial status of the North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, as contained in the report, as information

Minutes – Standing Policy Committee on Finance – May 10, 2022

DECISION MAKING HISTORY:

Moved by Councillor Orlikow,

That the recommendation of the Winnipeg Public Service be concurred in.

Carried

ADMINISTRATIVE REPORT

Title: North End Sewage Treatment Plant (NEWPCC) Upgrade Projects,

Project ID: 2031001304, 2031001310, 203110013B and 203110028B,

Quarterly Project Status Report No. 28 For the Period Ended February 28, 2022

Critical Path: Standing Policy Committee on Finance

AUTHORIZATION

Author	Department Head	CFO	CAO
L. McCusker, P. Eng., Acting Manager of Engineering Services	Y. Cenerini Acting Director, Water and Waste Department	C. Kloepfer	M. Jack

EXECUTIVE SUMMARY

Project On Schedule: Yes □ No ☑ Project On Adopted Budget: Yes □ No ☑

Percent of Schedule Complete: 25% Percent of Adopted Budget Spent: 19%

Red River Solutions (RRS) has commenced with the 60% design submissions. Site excavations and foundation activities have commenced. A risk identified during the excavation activities was the discovery of impacted soils exceeding industrial standards. A phase 2 environmental site assessment, which will include soil sampling to identify and delineate the extents of the impacted soils to fully determine volume of material to be removed, will be carried out by RRS. It is anticipated that remediation/disposal costs will be covered through the project's contingency; schedule delays due to the impacted soils are not expected.

Design work related to the Distributed Control System (DCS) Migration Project and Primary Clarification Projects are ongoing.

Deloitte LLP completed a draft Delivery Model Analysis Report that incorporates findings of the market sounding result that was presented to Council in November 21, 2021. The Delivery Model Analysis Report will recommend a procurement model for the Biosolids Facilities Project.

On February 24, 2022, Council approved that future tenders for the NEWPCC Upgrade Projects require bidders to include the following as part of their bid submissions:

- Specific information on its intended partnerships or self-directed plans to secure a skilled project labour workforce.
- Estimated numbers of and classifications of skilled tradespersons to be employed.
- Specific commitments to engage skilled labour including targets for employment of Indigenous peoples and other under-represented groups within the Manitoba market.

 Proposed plans and partnerships with organizations to promote employment and training initiatives for Indigenous and other under-represented groups within the Manitoba market.

In December 2021 the Province asked the Public Service to submit an updated NEWPCC Interim Phosphorus Reduction and Upgrade Plan Update, including full project completion by 2030. The City submitted a report on February 15 that outlined progress to date, work to be completed in 2022 and explanation that a full schedule could not be produced until commencement of the biosolids project, which has been held up for 2.5 years due to ICIP funding delays.

On April 14, 2022 the Province advised that the City report of February 15, 2022 did not address their ask. The Director of Environmental Approvals has requested a multi-year plan by 2030. Further this plan must include a funding model for the entire upgrade and the Public Service should consider the advice put forward by the provincial departments of Consumer, Protection and Government Services and Municipal Relation (Appendix E).

The Public Service is reviewing a revised Class 3 cost estimate and assessing impacts to the project as a result of the ICIP Funding Delays as well as the new requirement to meet 1 mg/l interim phosphorus in the new biosolids facility.

The Advisory Committee has reviewed this report and recommends that the report be sent to the Standing Policy Committee on Finance.

RECOMMENDATIONS

That the financial status of the North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, as contained in this report, be received as information.

REASON FOR THE REPORT

The Asset Management Administrative Standard FM-004 requires all projects with a total estimated cost of \$25 million (2022) or more report quarterly to the Standing Policy Committee on Finance. This threshold is adjusted annually for construction inflation as part of the annual Capital Budget approval. The Standing Policy Committee on Finance may also request reporting on any capital project.

IMPLICATIONS OF THE RECOMMENDATIONS

No implications.

HISTORY/DISCUSSION

See Appendix C – Key Project Events (History)

(Update from last report)

NEWPCC Upgrade: Power Supply and Headworks Facilities

Power Supply Facility

Design Build Execution

• **RFP 40-2014:** KGS Group's (Owner's Advocate) Phase 2 work, for professional engineering services during construction, continues under a supplemental agreement to RFP 40-2014.

RFP 599-2015B: The design build contract executed on April 16, 2018 with Black & McDonald Ltd is now substantially complete. Submission of project close-out documents are required for total completion to be achieved. Black & MacDonald Ltd continues to submit these documents and liquidated damages are being applied until total completion is achieved.

Headworks Facilities

In December 2021, the Communication Tower located at NEWPCC was demolished as the replacement tower is fully functional. The previous tower location will be used for future NEWPCC upgrades.

Design

- RFP 182-2015 DCS Migration: As part of their phase 2 engineering consulting services, AECOM was required to carry out professional engineering services for plantwide migration of the existing distributed control system to a new process control system. The preliminary design is now complete and detailed design is ongoing.
- **RFP 785-2020:** AECOM is continuing with detailed design for the primary clarification facility upgrades. The Hazard and Operability Analysis Workshop has been completed.

Design Build Execution

- RFP 182-2015 Headworks Phase 2: AECOM is currently providing owner's advocate services during the design build of the NEWPCC Upgrade: Headworks Facilities Project.
- RFP 659-2018B: RRS has started submitting 60% design documents for review. The project funding sign has been installed facing Main street.
 - Soil stripping of the main construction site, north east of the plant, is complete and environmental analysis on stockpiled materials has been conducted. Test results indicate that some of the soil is impacted and exceeds industrial standards. Planning is underway to confirm the extents of impacted areas. The City and RRS are also investigating possible disposal options for the stockpiled impacted material and will be contacting the Province with disposal plans shortly.
 - Pile driving analysis and vibration testing is now complete. RRS has also completed four out of a total of 104 milestones in the Design Build Agreement.
- **RFP 64-2021:** Altus Group Limited, the independent payment certifier for the Headworks Facilities Design Build Project, has certified a total of four milestones completed by RRS. The milestone payments have been paid by the City.
- RFP 65-2021: Colliers Project Leaders Inc. was awarded the professional consulting services for referee services of the NEWPCC Upgrade: Headworks Facilities Project. The tri-party agreement was executed between Colliers Project Leaders Inc, RRS, and

the City on July 19, 2021. This contract will only be used if a third-party referee is required for dispute resolution on the project.

NEWPCC Upgrade: Biosolids Facilities

On February 24, 2022, Council approved that future tenders for the NEWPCC Upgrade Projects require bidders to include the following as part of their bid submissions:

- Specific information on its intended partnerships or self-directed plans to secure a skilled project labour workforce.
- Estimated numbers of and classifications of skilled tradespersons to be employed.
- Specific commitments to engage skilled labour including targets for employment of Indigenous peoples and other under-represented groups within the Manitoba market.
- Proposed plans and partnerships with organizations to promote employment and training initiatives for Indigenous and other under-represented groups within the Manitoba market.
- RFP 182-2015 Biosolids Preliminary Design: A revised preliminary design for the Biosolids Facility Project is necessary due to updated process information since the previous preliminary design. AECOM has submitted the draft preliminary design report and a Class 3 Construction Cost Estimate. The updated preliminary design report included a review and validation of plant capacity and sizing of the system, new requirements for phosphorus control as required by the Province, and connections to existing plant. They are working to finalized the report based on comments provided by the City.
- RFP 786-2021: Hanscomb Canada Ltd was engaged on December 2, 2021 as an
 independent cost consultant to provide a third-part Class 3 Construction Cost Estimate
 for the NEWPCC Upgrade: Biosolids Facilities Project based on AECOM's updated
 preliminary design. A draft report has been provided to the City for review.
- RFP 385-2021: Deloitte LLP completed a draft Delivery Model Analysis report that recommends a procurement model for the Biosolids Facility Project.

Notice of Alteration (NOA) for NEWPCC

The City continues to submit monthly and quarterly progress reports to the Province.
 The quarterly reports are posted publicly.

¹ Owner's Advocate Class 5 Estimate

Risk (Update from last report)

NEWPCC Upgrade: Power Supply and Headworks Facilities

Two categories of impacted soils were uncovered by RRS during soil stripping and excavation. Stockpile 1 from the new Headworks site (3,540 m3) is impacted above Industrial site limits. Stockpile 2 (7,004 m3) from the laydown/Highland Ave area, is impacted above Commercial criteria, but under Industrial criteria. Both stockpiles will be disposed of and/or transported to locations as approved by the Province. More impacted soils may be uncovered as excavation progresses. RRS is working on a delineation plan, to be approved by the City and Province, that will include subsequent phase 2 environmental soil sampling and testing. The costs are unknown at this time; however, it is anticipated that the costs will be covered through the project's contingency; no schedule delays due to the impacted soils are expected.

NEWPCC Upgrade: Biosolids Facilities

There is a delay to the Biosolids Facilities Project due to the Province's request to review the procurement model for the project. This in turn delayed the Investing in Canada Infrastructure Program (ICIP) application submittal from the Province to the Federal Government. This continues to be a risk to the commencement of this project.

² On September 26, 2019 Council approved Project 2 conditional upon Federal\Provincial Funding. Total contains \$15.33 million for engineering. That an application for Federal\Provincial funding be submitted for Project 1.

 $[\]textbf{3} \ \mathsf{On} \ \mathsf{January} \ \mathsf{30}, 2020 \ \mathsf{Council} \ \mathsf{approved} \ \$\mathsf{15.33} \ \mathsf{million} \ \mathsf{budget} \ \mathsf{for} \ \mathsf{Project} \ \mathsf{2} \ \mathsf{to} \ \mathsf{proceed} \ \mathsf{with} \ \mathsf{engineering} \ \mathsf{services}.$

⁴ In a letter dated April 1, 2021, the Province confirmed that funding for Headworks Project would be reduced to \$96.749 million from \$100.300 million (Province) and to \$116.111 million from \$120.373 million (Federal), resulting in an increase of \$7.813 million to the City's share of costs.

⁵ On May 27, 2021 Council approved a budget increase of \$65 million funded by \$32.5 million debt and \$32.5 million Environmental Projects Reserve.

⁶ On July 23, 2021 Federal and Provincial ICIP funding of \$212.86 million was announced for the Headworks Project. Project 3 - NEWPCC Upgrade: Nutrient Removal Facilities - \$828 million is, pending Council approval.

Property Acquisition (Update from last report)

Stakeholder Engagements/Communications (Update from last report)

N/A

Subsequent Events after Report Period End Date

A procurement recommendation report and a revised budget report for the NEWPCC Biosolids Facilities Project will be presented to Council in Q2 2022.

On March 10, 2022, RRS provided a notice to the City under the Force Majeure clause in the Design Build Agreement. The notice indicated the potential for RRS to encounter work delays due to supply chain issues and increased costs due to fuel and freight prices associated with the ongoing Russia-Ukraine crisis.

RRS will be holding a Job Open House on April 21, 2022 at the Red River Community Center to encourage local tradespersons to work on the NEWPCC Headworks Facilities Upgrade Project.

On April 14, 2022, the Province of Manitoba acknowledged receipt of the City's February 15, 2022 Interim Phosphorous Reduction and NEWPCC Upgrade Plan Update, and the City's March 11, 2022 letter providing additional information related to the assessment of options to enhance interim phosphorous reduction.

In their response (attached as Appendix E), the Province indicated the City did not provide sufficient information to determine if the City has made appropriate progress to complete the upgrades to the facility. In addition to continued monthly and quarterly progress reports, the Province requested the submission of an updated multi-year plan by June 30, 2022 that includes a funding model to complete the full upgrade, including the biological nutrient removal facilities, and a procurement approach to have the upgrades completed by December 31, 2030.

NEWPCC Interim Phosphorus Project Update

Preliminary design for the project has been completed and detailed design has commenced. The cost for Interim phosphorus removal is under review as detailed design highlighted a need for additional dosing locations to maximize the amount of phosphorus removal and to minimize impact on the biological process.

On December 29, 2021, the City provided a Letter to the Province regarding the assessment of options to enhance interim phosphorus reduction at NEWPCC. The Province responded in February 2022 requesting more information. Additional information was provided on March 14, 2022.

FINANCIAL IMPACT

Financial Impact Statement Date: March 30, 2022

Project Names:

North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, Project IDs: 2031001304, 2031001310, 203110013B and 203110028B, Quarterly Project Status Report No. 28 For the Period Ended February 28, 2022

COMMENTS:

CONSULTATION

This Report has been prepared in consultation with:

N/A

OURWINNIPEG POLICY ALIGNMENT

01-3 Prosperity Direction 1: Provide efficient and focused civic administration and governance. This report supports demonstration of accountability through service performance measurement and reporting.

02-2 Environment: The NEWPCC Upgrade Projects will reduce the environmental impact of our citizens on the Red River and the downstream lakes and rivers. They are in collaboration with the Regulatory Licence requirements issued by the Province of Manitoba.

WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

NEWPCC Upgrade Project 1: Power Supply and Headworks Facilities

N/A

NEWPCC Upgrade Project 2: Biosolids Facilities

NEWPCC Upgrade: Biosolids Facilities Project aligns with the Strategic Opportunity #6 Waste Reduction and Diversion found on page 51 of the Climate Action Plan approved by Council on September 20, 2018; Key Directions 6.3 & 6.4.

The Water Protection Act requires the City to reuse the wastewater biosolids, and to recover the nutrients from the biosolids to the maximum extent possible. The intent is for the facility to produce a Class A Biosolids which can be reused resulting in diversion of Biosolids from the landfill.

WINNIPEG POVERTY REDUCTION STRATEGY ALIGNMENT

On February 24, 2022, Council directed that bidders for the Biosolids Facilities Project include the following their submissions:

- Specific commitments to engage skilled labour including targets for employment of Indigenous peoples and other under-represented groups within the Manitoba market
- Proposed plans and partnerships with organizations to promote employment and training initiatives for Indigenous and other under-represented groups within the Manitoba market

This aligns with Goal 1 - Equity and a Culture of Caring are Demonstrated through Strategy Implementation and Systems Change; Topic- Community Benefits in City Projects; of the Winnipeg Poverty Reduction strategy Implementation Plan.

Project Scope

The Power Supply and Headworks Facilities projects will address end-of-life equipment at the front end of the plant and upgrade the power supply to provide adequate power capacity for the NEWPCC Upgrade Projects. The Project design will accommodate expected influent flows and loads to 2037 and take into account future regulatory trends and long term planning to year 2067.

⁵ Actual costs to date / Amended budget

Appendix C – Key Project Events (History)

THE PROJECT

The goal of this project is to upgrade the North End Sewage Treatment Plant (NEWPCC) to meet new Regulatory Licence requirements regarding the maximization of nutrient removal and biosolids reuse and new effluent limits for nitrogen and phosphorous. The upgrade will also add wet weather treatment capability; add a new facility to treat the sludge from all three plants; and replace end-of-life equipment. The Project design will accommodate expected influent flows and loads to 2037. It will also consider future regulatory trends and long-term planning to the year 2067 to facilitate effective process or facility modifications should they be required.

A new power sub-station is required at the NEWPCC to accommodate the additional power demand of the upgrades at the facility. The power supply upgrade was delivered as a separate project from the main NEWPCC upgrade to allow for early procurement of long-lead items, such as transformers, to ensure that the electrical power upgrade is available for the new processes when needed.

The delivery method for NEWPCC Power Supply and Headworks Facilities Upgrade Projects is largely design build (DB) with a small scope being procured as design bid build (DBB).

The upgraded facility will have an economical whole-life cost and be an efficient and safe workplace for operational personnel. In addition, the plant must operate continuously during the work and continue to meet current effluent limits. The impact of construction and commissioning to the capacity of the treatment facility will be minimized as much as possible.

In 2003 Clean Environment Commission Hearings on the City's wastewater collection and treatment systems, Manitoba Conservation and Water Stewardship (now Manitoba Sustainable Development, the Regulator) notified the City that it intended to issue a licence for the NEWPCC that would require control of nutrients discharged to the Red River.

On May 16, 2007, Council authorized the Chief Administrative Officer to finalize the terms and conditions of a contribution agreement with the Government of Canada and the Province of Manitoba for funding of Wastewater Treatment Plant upgrades under the Canada Strategic Infrastructure Fund (CSIF).

On November 19, 2008, City Council authorized the Winnipeg Public Service to:

- Begin the procurement of a strategic partner that could bring private sector experience to the design, construction, finance, and potentially the operation of the North and South End Sewage Treatment Plants as well as potential operation of the West End Sewage Treatment Plant
- Authorize the Chief Administrative Officer to approve and issue the Request for Expressions of Interest followed by a Request for Qualifications and the Request for Proposals

On May 6, 2009 the Environment Act Licence (EAL) No. 2684 RRR was issued for the NEWPCC.

On May 19, 2010 Council:

- Directed the Chief Administrative Officer to approve and issue a Letter of Notification to Veolia in order to immediately begin design and construction of the South and North End Sewage Treatment Plant upgrades and expansion and biosolids handling facility
- Delegated the authority to the Chief Administrative Officer to "approve contract awards for upcoming South and North End Sewage Treatment Plant capital projects where the value of each contract does not exceed \$30 million and there are sufficient funds in a budget approved by Council

On June 16, 2011, the Save Lake Winnipeg Act amending sections of the Water Protection Act (Act) came into effect. Section 4.2(3) of the amended Act required the City to submit a plan that details how the City will comply with subsections 4.2(1) and (2).

The NEWPCC Upgrading Plan was submitted to the Regulator in compliance with Section 4.2(3) of the amended Water Protection Act on June 15, 2012. The Regulator approved the Upgrading Plan on October 2, 2012. The Department submitted the NEWPCC Master Plan and the revised NEWPCC Master Plan on September 27, 2013 and April 28, 2014 respectively. The Master Plan was approved by the Regulator on May 29, 2014.

In the Regulator's Licence alteration Letter dated December 30, 2014, the project completion date was specified as December 2019. However, the Regulator was notified on June 23, 2016 that the project schedule was not achievable. Manitoba Sustainable Development acknowledged receipt of this notice on August 16, 2016 and indicated they had "no concerns at this time." Regular schedule updates and progress reports continue to be submitted to Manitoba Sustainable Development on a quarterly basis.

In the second quarter of 2017, the Department reported that an updated conceptual design project cost estimate was received from the design consultant. This new information indicated costs over a billion dollars, much higher than the currently approved budget of \$795.59 million (Class 5 estimate).

The Adopted Budget, \$795.59 million, was based on a Class 5 cost estimate which has an Association for the Advancement of Cost Engineering (AACE) expected accuracy range of -50% and + 100% or \$397.80 million to \$1,591.18 million.

On February 28, 2019, Council approved the recommendation to split the planned NEWPCC Upgrade Project into three distinct projects and execute them based on process criticality and available funding. The recommendation to Council requested approval to proceed with the project scope for Power Supply and Headworks Facilities. Other levels of Government funding for the remaining projects to complete the plant upgrade are required.

The three capital projects and Class 3 cost estimates (including interest charges) to complete the NEWPCC Upgrade are identified as:

- 1. NEWPCC Upgrade: Power Supply and Headworks Facilities \$473 million
- 2. NEWPCC Upgrade: Biosolids Facilities \$553 million
- 3. NEWPCC Upgrade: Nutrient Removal Facilities \$828 million

The total budget to upgrade NEWPCC is approximately \$1,854 million; based on a class 3 cost estimate which has an AACE expected accuracy range of -20% and +30% or \$1,483.2 million to \$2,410.2 million. This amount includes an estimated \$155 million in interest charges to be capitalized during the construction period. The total budget was updated from \$1,789 million to \$1,854 million as a result of the budget amendment increase of \$65 million for the NEWPCC Upgrade: Power Supply and Headworks Facilities Capital Budget. The budget increase was approved by Council on May 27, 2021.

On December 5, 2019, a response was received from Manitoba Conservation and Climate, Environmental Approvals Branch with regards to the Notice of Alteration (NOA) for NEWPCC submitted by the City July 30, 2019. The response indicated that the NOA was not approved and that the City will be out of compliance with the Environmental Act Licence 2684 RRR and with the phosphorus compliance plan pursuant to the Water Protection Act in January 1, 2020. In the absence of an approved phosphorus compliance plan, the City was required to participate in two project committees namely; the Project Steering Committee and Project Advisory Committee.

On September 26, 2019, Council approved a 2019 capital project budget of \$552,712,000.00, for NEWPCC Upgrade: Biosolids Facilities, subject to final written confirmation of federal and provincial funding satisfactory to the Chief Financial Officer.

On January 30, 2020, Council approved \$15,334,000.00 from the Biosolids Facilities Budget to commence engineering services.

On February 19, 2020, Minister Squires sent a letter to the Mayor indicating that additional funding of \$21.8 million is an initial payment to be allocated to the NEWPCC Upgrade Project under any potential ICIP arrangements, along with the previous allocation of \$34.4 million for a total of \$56.2 million.

On September 20, 2020 Council approved that the City agree to transfer \$321.24 million of Federal Government's funding under the ICIP from the Public Transit Infrastructure Stream to the Green Infrastructure Stream to fund the Federal Government's funding portion for the NEWPCC Upgrade: Headworks Facilities Project and the NEWPCC Upgrade: Biosolids Facilities Project as per the Province of Manitoba's requirement, subject to certain conditions.

The design build of the NEWPCC Power Supply Project was substantially completed in Q4 2020.

On March 25, 2021, Council adopted that:

- The Government of Canada and the Province of Manitoba be requested to provide confirmation of approval of ICIP for the NEWPCC Upgrade Projects: Headworks Facility Project and Biosolids Facility Project
- The Province of Manitoba be requested to confirm the City's recommended procurement methodology for the Biosolids Facility Project

 The Public Service be directed not to proceed with detailed engineering design for the Biosolids Facility design-bid-build project, in the amount of \$15.334 million, as approved by Council on January 30, 2020, until such time as the confirmation requested in recommendations 1 and 2 have been received

In a letter dated April 1, 2021, the Province confirmed that funding for the Headworks Project will be reduced to \$96.749 million from \$100.300 million (Province) and to \$116.111 million from \$120.373 million (Federal). This means that the City's share of costs will increase by \$7.813 million as a result of the owner advocate costs incurred.

On May 18, 2021, the Executive Policy Committee concurred in the recommendation of the Public Service, as amended, that:

- The current Operation and Maintenance of Winnipeg's sewage treatment utility shall remain public and that the Operation and Maintenance not be included as part of the P3 market sounding
- That a single source contract be approved with Deloitte LLP of up to \$400,000.00 to conduct a market sounding for a Design, Build and Financing P3 for the Biosolids and Nutrient Removal facilities projects of the NEWPCC upgrades
- That the Public Service report back to Council on the results of the market sounding and analysis

On May 27, 2021, Council approved

- Red River Solutions, an Aecon Oscar Renda Joint Venture, as the Preferred Proponent for the Design Build of the NEWPCC Upgrade: Headworks Facilities Project
- A budget amendment increase of \$65,000,000.00 for the NEWPCC Upgrade: Power Supply and Headworks Facilities Capital Budget, to be funded 50/50 through utility rates and debt financing
- Review of the AACE Class 3 cost estimates for Biosolids and Nutrient Removal Facilities
 projects and refer any increases to the 2022 capital budget process; and to update the
 ten-year water and sewer financial plan and report back to Council in October 2021

On May 31, 2021, the NEWPCC Upgrade: Headworks Facilities was approved for Federal and Provincial funding under the ICIP – Green Infrastructure – Environmental Quality Substream, with Federal contributions up to \$116,111,063.00 and Provincial Contributions up to \$96,749,543.00. Accordingly, the agreement for the design build of the NEWPCC Upgrade: Headworks Facilities was executed with RRS on June 11, 2021

On July 23, 2021, a formal press release regarding the approval of funding through the ICIP application for the NEWPCC Upgrade: Headworks Facilities was carried out at the NEWPCC. All three levels of government were in attendance.

A joint news release by the Province of Manitoba and the City was issued on November 24, 2021 regarding the advancement of the City's funding application to the Federal Government of Canada for the NEWPCC Upgrade: Biosolids Facilities Project through the ICIP.

RISKS AND RISK MITIGATION STRATEGIES

There are risks associated with the cost and schedule for a project that is this large and complex especially at the early stages. In addition, the final bid amounts for projects are unknown until the project agreement is finalized with the Design Builder.

In consultation with our engineering advisors, it was necessary to make estimates about the pace of engineering design and the pace of construction. Any delays typically result in increases in cost.

An ongoing risk management strategy has been implemented for both the NEWPCC Upgrade Power Supply and Headworks Facilities Projects. It includes a proactive process of identifying risks, performing qualitative and quantitative risk analyses, creating response plan strategies, and ongoing monitoring. The risk management process is an active part of the management of the projects. The projects will also incorporate structured Hazard and Operability Analysis and a Construction Hazard Assessment Implication Review. Since detailed design and construction will be carried out through a DB contract, the Winnipeg Sewage Treatment Program (WSTP) will be identifying and transferring as much risk as reasonable to the Design Builder.

The Risk Registers for each of the Projects contain cost and schedule risks associated with design, procurement, construction, operation, and unknown events. The Risk Register is reviewed and updated regularly by the WSTP.

Appendix D - Funding

North End Sewage Treatment Plant (NEWPCC) and Winnipeg Sewage Treatment Program (WSTP)

1) Funding for the NEWPCC is as follows:

NEWPCC Nutrient Removal Facilities		Funded to Date		Funding Pending		Total Funding		City Share of
(in \$millions)	Total Cost	Canada	Manitoba	Canada	Manitoba	Canada	Manitoba	Costs
Provincial Funding Power Supply and Headworks Facilities Funding Dependent Biosolids Facilities Nutrient Removal Facilities	\$ 473.38 552.71 828.06			\$ 116.11 200.87	\$ 96.75 167.38	\$ 116.11 200.87	\$ 96.75 167.38	\$ 260.52 184.46
