Minutes – Standing Policy Committee on Finance – June 19, 2014

REPORTS

Minute No. 84  Automatic Fare Collection System – Financial Status Report No. 7 for
the period ending March 31, 2014

STANDING COMMITTEE DECISION:

The Standing Policy Committee on Property and Development concurred in the recommendation
of the Winnipeg Public Service and received the report as information.
Minutes – Standing Policy Committee on Finance – June 19, 2014

DECISION MAKING HISTORY:

Moved by Councillor Havixbeck,
That the recommendation of the Winnipeg Public Service be concurred in.

Carried

David M. Sanders submitted a communication dated June 19, 2014, with respect to the Automatic Fare Collection System – Financial Status Report No. 7 for the period ending March 31, 2014
ADMINISTRATIVE REPORT

Title: AUTOMATIC FARE COLLECTION SYSTEM – FINANCIAL STATUS REPORT NO. 7 FOR THE PERIOD ENDING MARCH 31, 2014

Critical Path: STANDING POLICY COMMITTEE ON FINANCE

RECOMMENDATIONS

That the financial status of the Automatic Fare Collection System Replacement Project as contained in the report be received as information.

REASON FOR THE REPORT

Administrative Standard No. FM-004 requires quarterly reporting to the Standing Policy Committee on Finance.

IMPLICATIONS OF THE RECOMMENDATIONS

The project is currently within budget.

HISTORY

On February 22, 2006, Council approved the report submitted by the Transit Department entitled Implementation Plan for Rapid Transit Task Force Recommendations. The implementation plan included a recommendation that the existing fareboxes be replaced with an automated fare collection system. The existing fareboxes date back to the early 20th Century and have been out of production for decades. The implementation of a new fare collection system will modernize and simplify the fare collection process, provide more convenience and options for passengers, and improve the security of fare collection.

The Automatic Fare Collection System has a total budget of $17.74 million; $15.24 million was approved in the 2011 and earlier Capital Budgets and Council approved the transfer of an additional $2.5 million from surpluses in the 2011 Transit Buses Capital Project and the Transit System Funds retained earnings at its meeting of July 20, 2011.
MAJOR PROJECT STEERING COMMITTEE

Administrative policy for projects with capital costs exceeding $10 million requires formation of a Major Project Steering Committee. The Committee has been formed and its members are:

Paul Olafson, Corporate Controller, Corporate Finance Department
Clive Wightman, Director of Community Services
Dave Wardrop, Director of Transit

The Committee has reviewed this report and recommends that the report be sent to the Standing Policy Committee on Finance.

PROJECT STATUS

The project is currently within budget.

DESCRIPTION OF PROJECT

Fare collection is a core element of Transit’s business and has an impact on the operations of every division within the department. This is an extremely complex technology project involving the installation of electronic validating fareboxes on Transit’s fleet and the implementation of a smart card based automatic fare payment system that is supported by the necessary financial and information technology hardware and software systems.

The electronic validating fareboxes have been configured to accept coins only and collect, secure, reliably count and report all fare payments. They have also been configured to print and validate transfers. The electronic fare card reader will be used to read and update contactless electronic smart cards.

All pre-purchased fare products, including passes and advance trip purchases, will be offered on electronic smart cards. These cards would contain a record of the payment, including the time of payment, and would constitute the “transfer” to permit the passenger to board another bus for free during the valid time period.

Retail outlets located throughout the city, telephone and on-line systems will be used by passengers to conveniently reload transit products or value on to reloadable electronic smart cards.

The new fare collection system will be designed to allow the addition of a variety of future enhancements. This will include the capability to easily adjust or increase the number of fare classes to suit future fare policy or marketing initiatives.

The primary contract for the supply of the automatic fare collection system was awarded to Garival Inc. of Laval, Quebec in the estimated amount of $12,934,470.00 before all taxes in January 2012.

PROJECT SCHEDULE

The Automatic Fare Collection System Project is being delivered in two phases. Phase 1 was completed on June 14, 2013 and consisted of the installation of the new fareboxes on the entire bus fleet. The fareboxes are equipped with a coin counter/validator, transfer printer, transfer reader and a ticket chute. Paper tickets and monthly and weekly flash passes will continue to be used during Phase 1 and early in Phase 2.
Smart cards are being implemented as part of Phase 2 of the project. The smart card system has been in development during 2013 and system testing began in November. Retesting and refinements are currently ongoing. Comprehensive pilot testing will follow. The pilot test will verify the operation of the various hardware and software elements of the system required to purchase smart cards and fare products from retailers, customer service terminals and on-line, manage the card inventory, use the smart cards on buses and use the reporting capabilities of the system. The pilot test will be conducted using Transit employees. On the successful completion of the pilot test, the smart cards will be rolled out to the public in stages by passenger class to minimize any potential problems with the distribution to hundreds of thousands of Transit customers.

The delivery of the project is being accomplished through seven separate contracts, which were awarded as shown in the table below.

Total Award Amount $14,493,294.00

1A portion of these awards have been charged to separate projects as the contract work spanned multiple projects ($461,125.00)

Total Award Amount Applied to Fare Collection $14,032,169.00
RISK AND MITIGATION STRATEGIES

There have been very few large scale electronic smart card implementations in North America and elements of this project have been developed to meet Transit’s specific requirements. This new technology must undergo extensive testing and verification before it can be introduced to the public. Presently, the major risk to the project is that the complexity of the implementation has required more system development and verification than was anticipated in the initial development and test period. If the development and testing is rushed in the interests of a more rapid deployment, there is a danger that the system provided to the public will contain defects that impact their ability to purchase or use fare products. Within the last two to three years, several smart card implementations throughout North America have had to be pulled back after introduction or have caused substantial passenger dissatisfaction when systems did not function properly.

The risk of a delay in the development of the smart card technology has been mitigated with the two phase implementation. With a phased implementation, the coin validating and automated transfer verification technology have already been placed into service.

The risk of technical or card distribution problems following the smart card implementation have been mitigated by planning for a pilot test and using a phased roll out strategy. Smart cards will be introduced by passenger classes beginning with Handi-Transit registrants, seniors, youth, full fare, eco pass and post-secondary customers. During the roll out, paper passes and tickets will not be phased out until the volume of smart cards sold is sufficient to avoid a surge in demand and excessive line ups at card distribution points. Cards will also be available to the public at 87 locations throughout the city to minimize line ups. Following the initial roll out, these same locations will be available to load fare products onto cards in addition to online and 311.

Summary

Contracts Issued to Date: $14,032,169

Total Change Orders (Garival): $201,700

Other Project Costs
(Provincial Retail Sales Tax, Overheads, Salaries, Communication and Other Contingencies): $3,506,131

Total Approved Budget: $17,740,000
To the end of the previous reporting period, ten change orders with Garival were implemented at a total cost, before taxes, of $981,141.80.

Four change orders have been approved between January 1 and March 31, 2014. RFC017 revises the number of smart cards that will be provided under the contract. The major change is a substantial reduction in the number of disposable smart cards that will be required. This has been made possible with the planned introduction of Transit tokens. This change order will provide a savings of $932,375. Change orders RFC 020, RFC024 and RFC025 were approved for spare parts and maintenance tools and totaled $152,933.60. To date, fourteen change orders with Garival have been implemented and have increased the total value of the contract by $201,700.40.

Budget revisions will be accommodated in the External Contracts portion of the project.

Professional Services include the following:

1. Technical engineering consultation on the design and testing of the fare collection system;
2. External auditing of systems and procedures necessary to secure revenue; and
3. Marketing to effectively communicate the changes to the public.

Other equipment includes the following:

1. Infrastructure changes and equipment in Transit garage buildings and treasury to allow secure revenue servicing and coin handling;
2. The communications hardware required for the new fareboxes to exchange route and bus stop information with the bus radio system and use the wifi system within Transit buildings to communicate with data servers to upload revenue collection information from the bus and download fare structure and smart card update information to the farebox on a daily basis.

The project cash flow is included in Appendix 1.
