## Minutes – Standing Policy Committee on Finance – October 14, 2020

#### **REPORTS**

Item No. 3 North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, Project ID: 2031001304, 2031001310, 203110013B and 203110028B, Quarterly Project Status Report No. 22 For the Period Ended April 30, 2020

## STANDING COMMITTEE DECISION:

The Standing Policy Committee on Finance concurred in the recommendation of the Winnipeg Public Service and received the financial status of the North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, as contained in the report, as information.

## **Minutes – Standing Policy Committee on Finance – October 14, 2020**

## **DECISION MAKING HISTORY:**

Moved by Councillor Gilroy,

That the recommendation of the Winnipeg Public Service be concurred in.

Carried

## **ADMINISTRATIVE REPORT**

Title: North End Sewage Treatment Plant (NEWPCC) Upgrade Projects,

Project ID: 2031001304, 2031001310, 203110013B and 203110028B,

Quarterly Project Status Report No. 22 For the Period Ended April 30, 2020

**Critical Path: Standing Policy Committee on Finance** 

## **AUTHORIZATION**

Author	Department Head	CFO	CAO
G. K. Patton, P. Eng., Manager of Engineering Services	M. L. Geer, CPA, CA, Director, Water and Waste Department	P. Olafson, Interim CFO	M. Ruta, Interim CAO

#### **EXECUTIVE SUMMARY**

Project On Schedule: Yes ☑ No □ Project On Adopted Budget: Yes ☑ No □

Percent of Schedule Complete: 11% Percent of Adopted Budget Spent: 11%

The Request for Proposal was issued to the two proponents, Aecon/Oscar Renda joint venture (Red River Solutions) and Graham/PCL joint venture, shortlisted as the prequalified proponents for the Design Build of the City of Winnipeg's NEWPCC Upgrade: Headworks Facilities Project, on March 10, 2020.

The construction of the new Power Supply Facility is ongoing; however, due to the impact of COVID-19, workforces are being limited to necessitate social distancing. Works associated with the relocation of the existing communications tower has been suspended due to COVID-19 safe work procedures.

The Advisory Committee has reviewed this report and recommends that the report be sent to the Standing Policy Committee on Finance.

#### **RECOMMENDATIONS**

That the financial status of the North End Sewage Treatment Plant (NEWPCC) Upgrade Projects, as contained in this report, be received as information.

#### REASON FOR THE REPORT

The Asset Management Administrative Standard FM-004 requires all projects with a total estimated cost of \$24 million (2020) or more report quarterly to the Standing Policy Committee on Finance. This threshold is adjusted annually for construction inflation as part of the annual Capital Budget approval. The Standing Policy Committee on Finance may also request reporting on any capital project.

#### IMPLICATIONS OF THE RECOMMENDATIONS

No implications.

#### HISTORY/DISCUSSION

See Appendix C – Key Project Events (History)

(Update from last report)

On February 19, 2020 Minister Squires sent a letter to the Mayor indicating that additional funding of \$21.8 million is an initial payment to be allocated to the NEWPCC project under any potential Investing in Canada Infrastructure Program (ICIP) arrangements, along with the previous allocation of \$34.4 million for a total of \$56.2 million.

## **NEWPCC Upgrade: Power Supply and Headworks Facilities**

## **Power Supply Facility**

This part of the project is in the Design Build execution phase.

- RFP 40-2014: KGS Group's (Owner's Advocate) Phase 2 work, for professional engineering services during construction continues under a Supplemental Agreement to RFP 40-2014.
- RFP 599-2015B: A design build contract was executed on April 16, 2018 with Black & McDonald Ltd and design is 99% complete. Construction work related to building mechanical, electrical and painting are ongoing and civil works have begun. The design build contractor has notified the Department that COVID-19 is an event beyond their control and as such constitutes a force majeure and they will be evaluating the potential impacts the pandemic will have on delivering the Project. Black & McDonald Ltd has not suspended on site operations; however, they are limiting workforce to necessitate social distancing.
- RFP 42-2018: A construction agreement was executed on July 11, 2018 with Manitoba Hydro. Design for the final arrangement was completed in Q4 2019. Construction of Manitoba Hydro's permanent power lines has been completed. Removal of UV transformer will be completed in Q3 2020.

#### **Headworks Facilities**

This part of the project is in the Procurement Stage.

- RFP 182-2015: AECOM Prepared the Request for Proposal documents and Technical Requirements issued to Proponents under RFP 659-2018B. They are also involved with responding to Request for Information (RFIs) associated with the Technical Requirement.
- RFP 9-2017: P1 Consulting (fairness advisor) is involved in the RFP process for the design build of the NEWPCC Upgrade: Headworks Facilities Project.
- RFP 102-2017: Blakes Cassels & Graydon (Legal advisor) is involved with the RFP process including responses to RFIs associated with the Design Build Agreement for the project.
- RFP 659-2018B: The Request for Proposal (RFP) documents and associate documents were issued to the two proponents, Aecon/Oscar Renda joint venture (Red River Solutions) and Graham/PCL joint venture, shortlisted as the prequalified proponents for the Design Build of the NEWPCC Upgrade: Headworks Facilities Project, on March 10, 2020.
- Bid Opportunity 68-2019: The work associated with relocating the communication tower from Parcel A to Parcel B of NEWPCC site was suspended due to COVID-19 Impacts; this suspension of work will not affect the Headworks Project.
- Tender 200-2020: In anticipation of construction work related to Headworks
   Facilities Upgrade and associated volume of traffic; the traffic signals at the
   intersection of Chief Peguis Trail and Main Street will be modified to enhance
   safe construction access to NEWPCC through Highland Avenue at Main Street.
   The design builder for the Headworks project will be required to realign Highland
   Avenue to Chief Peguis Trail to allow for safe construction access. Modification
   to the traffic signals will be managed by the Public Works Department.

## **NEWPCC Upgrade: Biosolids Facilities**

This part of the project is in the initiation stage.

## Notice of Alteration (NOA) for NEWPCC

The required interim phosphorus reduction plan and implementation plan has been submitted to the Project Advisory Committee. Submission of monthly progress reports to the Project Advisory Committee are ongoing.

## Table 1 – Contracts

## **Risk** (Update from last report)

## **NEWPCC Upgrade: Power Supply and Headworks Facilities**

## Power Supply Facility

The Department is working to assess the impact of the risk associated with COVID-19 on the project.

The electrical phase rotation risk mitigation is in-place.

## **Headworks Facilities**

There are no new risks identified for the Headworks Facilities project.

<sup>&</sup>lt;sup>2</sup> Cost Consultant Class 3 Estimate

## **NEWPCC Upgrade: Biosolids Facilities**

There are no risks identified for the Biosolids Facilities project

Table 3 – Significant Risks and Mitigations Strategies

NEWPCC Upgrade: Power Supply	and Headworks Facilities Project
Significant Risks and	Mitigation Strategies
Power Supply Facility	
Risk Statement and Explanation	Risk Mitigation Management Plan
New:	
COVID-19 Impacts	The Department is w orking to assess the impack of the risk
There may be an issue betw een the electrical phase rotation on Hydro incoming pow er and plant pow er requirements.	There will be thorough testing after Manitoba Hydro closes their disconnect switch and before main transformers are energized. Design Builder to coordinate with Manitoba Hydro to resolve phase rotation in a timely manner.
If there is a phase rotation issue Manitoba Hydro may need to disconnect and reconnect pow erlines which will case loss of power to the UV Facility transformer resulting in loss of redundancy to the UV Facility.	Ongoing close coordination with Manitoba Hydro and the Design Buildier. It is anticipated that the loss in redundancy would be less than one day.
Ongoing:	
Plant load transfer is required to commission new electrical system. Planned power outages and loss of redundancy periods are required for each plant process area, which increases the risk of process upset.	Design Builder to coordinate all load transfer activities with City to minimize disruption to plant processes.
Safey issues could occur as a result of coring through concrete wall / floor / ceiling during equipment installation. Utilities at NEWPCC are not always marked in drawings.	Design Builder is responsible for site safety. The Design Builder will scan the concrete infrastructure prior to coring.
Safety issues could occur as a result of increased traffic on the NEWPCC site.	The Design Builder has plans in place to address construction traffic. Construction traffic is largely limited to a separate entrance to the plant.
As part of construction activities, the power in an area believed to be de-energized could be energized resulting in a potential shock or arc flash and associated injury and equipment damage.	The Design Builder developed and implemented a Health and Safety Plan, Construction Phasing Plan and Interface Plan. The DB maintains close coordination with City personnel.
Mitigated:	
Manitoba Hydro may not have the required power available within the required timeframe.  Old electrical equipment and building parts may contain	Ongoing close coordination with Manitoba Hydro. Construction dates confirmed for line entrance structure. The Design Builder's Project Safety Plan includes
asbestos.	management of asbestos.
The Design Builder is not familiar with the existing equipment labelling, some of which may be confusing due to historical issues and thus there is a possibility of incorrect switching Closed:	City to carry out electrical sw itching of all equipment outside of the Design Builder's scope of w ork. Design Builder to prepare detailed plans of all sw itching events.
There may be unknown geotechnical conditions that impact the project schedule and cost.  The UV facility transformer must be de-energized during the	This risk is closed as subsurface works is complete.  This risk is closed as Manitoba Hydro construction is
Manitoba Hydro construction period. No pow er redundancy for the UV facility for a 4 w eek period.	complete.

NEWPCC Upgrade: Power Supply and Headworks Facilities Project										
Significant Risks and Mitigation Strategies										
Headworks Facilities										
Risk Statement and Explanation	Risk Mitigation Management Plan									
New:										
None										
Ongoing:										
There may be unknown conditions that may be associated with reusing existing facilities.	The DB agreement to include mechanism to deal with unforeseen conditions of existing facilities. Proponents will also be provided access to the site for due diligence and examination.									
Unknown existing conditions related to geotechnical, environmental and hazardous material may be encountered during construction causing schedule delays and additional costs.	Geotechnical investigations and environmental impact assessments are being carried out prior to construction to minimize unknowns. It is also anticipated that contracting with a single entity responsible for construction risks would minimize impact.									
Mitigated:										
Assumptions made on the grit quantities in the sludge may not be appropriate resulting in damage to grit sensitive equipment and under sizing of sludge facilities.	The grit characterization study of the raw sewage was carried out. This report will be included as a background document in the Design Build agreement for the prequalified proponents.									
Closed:										
The Project may be affected due to project costs now estimated to be \$1.8 billion.	A Class 3 cost estimate was carried out after preliminary design to validate the budget. An independent cost consultant was also retained to provide a Class 3 estimate.									
No existing legislation on odour release threshold causing potential impact and complaints from neighbors resulting in post - construction renovations or changes in operation at additional cost.	A field study with dispersion modelling has been carried out. Since this risk is mainly applicable to the NEWPCC Upgrade: Nutrient Removal Project it will be identified at the start of that project.

The funding forecast should match The Capital Budget Detail Sheet.

Project 3 - NEWPCC Upgrade: Nutrient Removal Facilities - \$828 million is, pending Council approval.

<sup>1</sup> On February 28, 2019 Council approved the existing project be amended to consist of three projects: Project 1 Power Supply and Headworks Facilities, Project 2 Biosolids Facilities, Project 3 Nutrient Removal Facilities. Budget of \$408.38 allocated for Project 1 Power Supply and Headworks Facilities and that an application for Federal\Provincial funding be submitted. Projects 2 and 3 remained pending Council approval.

<sup>2</sup> On September 26, 2019 Council approved budget of \$552.71 million for Project 2 conditional upon Federal\Provincial Funding.

<sup>3</sup> On January 30, 2020 Council approved \$15.33 million for Project 2 to proceed with engineering services. Total conditional budget includes \$15.33 million.

## **CONSULTATION**

This Report has been prepared in consultation with:

N/A

## **OURWINNIPEG POLICY ALIGNMENT**

01-3 Prosperity Direction 1: Provide efficient and focused civic administration and governance. This report supports demonstration of accountability through service performance measurement and reporting.

02-2 Environment: The NEWPCC Upgrade Projects will reduce the environmental impact of our citizens on the Red River and the downstream lakes and rivers. They are in collaboration with the Regulatory Licence requirements issued by the Province of Manitoba.

#### WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

## **NEWPCC Upgrade Project 1: Power Supply and Headworks Facilities**

N/A

## **NEWPCC Upgrade Project 2: Biosolids Facilities**

NEWPCC Upgrade: Biosolids Facilities Project aligns with the Strategic Opportunity #6 Waste Reduction and Diversion found on page 51 of the Climate Action Plan approved by Council on September 20, 2018; Key Directions 6.3 & 6.4.

The Water Protection Act requires the City to reuse the wastewater biosolids, and to recover the nutrients from the biosolids to the maximum extent possible. The intent is for the facility to produce a Class A Biosolids which can be reused resulting in diversion of Biosolids from the landfill.

## **Appendix C – Key Project Events (History)**

#### THE PROJECT

The goal of this project is to upgrade the North End Sewage Treatment Plant (NEWPCC) to meet new Regulatory Licence requirements regarding the maximization of nutrient removal and biosolids reuse and new effluent limits for nitrogen and phosphorous. The upgrade will also add wet weather treatment capability; add a new facility to treat the sludge from all three plants and replace end-of-life equipment. The Project design will accommodate expected influent flows and loads to 2037. It will also take into account future regulatory trends and long term planning to year 2067 to facilitate effective process or facility modifications should they be required.

A new power sub-station is required at the NEWPCC to accommodate the additional power demand of the upgrades at the facility. The power supply upgrade is being delivered as a separate project from the main NEWPCC upgrade to allow for early procurement of long-lead items such as transformers, to ensure that the electrical power upgrade is available for the new processes when needed.

The delivery method for NEWPCC Power Supply and Headworks Facilities Upgrade Projects is largely design build (DB) with a small scope being procured as design bid build (DBB).

The upgraded facility will have an economical whole-life cost and be an efficient and safe workplace for operational personnel. In addition, the plant must operate continuously during the work and continue to meet current effluent limits. The impact of construction and commissioning to the capacity of the treatment facility will be minimized as much as possible.

In 2003 Clean Environment Commission Hearings on the City's wastewater collection and treatment systems, Manitoba Conservation and Water Stewardship (now Manitoba Sustainable Development, the Regulator) notified the City that it intended to issue a licence for the North End Water Pollution Control Centre (NEWPCC) that would require control of nutrients discharged to the Red River.

On May 16, 2007, Council authorized the Chief Administrative Officer to finalize the terms and conditions of a contribution agreement with the Government of Canada and the Province of Manitoba for funding of Wastewater Treatment Plant upgrades under the Canada Strategic Infrastructure Fund.

On November 19, 2008, City Council authorized the Winnipeg Public Service to:

- Begin the procurement of a strategic partner that could bring private sector experience to the design, construction, finance and potentially the operation of the North and South End Sewage Treatment Plants as well as potential operation of the West End Sewage Treatment Plant
- Authorize the Chief Administrative Officer to approve and issue the Request for Expressions of Interest followed by a Request for Qualifications and the Request for Proposals

On May 6, 2009 the Environment Act Licence (EAL) No. 2684 RRR was issued for the NEWPCC.

## On May 19, 2010 Council:

- Directed the Chief Administrative Officer to approve and issue a Letter of Notification to Veolia in order to immediately begin design and construction of the South and North End Sewage Treatment Plant upgrades and expansion and biosolids handling facility
- Delegated the authority to the Chief Administrative Officer to "approve contract awards for upcoming South and North End Sewage Treatment Plant capital projects where the value of each contract does not exceed \$30 million and there are sufficient funds in a budget approved by Council

On June 16, 2011, the Save Lake Winnipeg Act amending sections of the Water Protection Act (Act) came into effect. Section 4.2(3) of the amended Act requires the City to submit a plan that details how the City will comply with subsections 4.2(1) and (2).

The NEWPCC Upgrading Plan was submitted to the Regulator in compliance with Section 4.2(3) of the amended Water Protection Act on June 15, 2012. The Regulator approved the Upgrading Plan on October 2, 2012. The Department submitted the NEWPCC Master Plan and the revised NEWPCC Master Plan on September 27, 2013 and April 28, 2014 respectively. The Master Plan was approved by the Regulator on May 29, 2014.

In the Regulator's Licence alteration Letter dated December 30, 2014, the project completion date was specified as December 2019. However, the Regulator was notified on June 23, 2016 that the project schedule was not achievable. Manitoba Sustainable Development acknowledged receipt of this notice on August 16, 2016 and indicated they had "no concerns at this time." Regular schedule updates and progress reports continue to be submitted to MB Sustainable Development on a quarterly basis.

In the second quarter of 2017, the Department reported that an updated conceptual design project cost estimate was received from the design consultant. This new information indicated costs over a billion dollars, much higher than the currently approved budget of \$795.59 million (Class 5 estimate).

The Adopted Budget, \$795.59 million, was based on a Class 5 cost estimate which has an Association for the Advancement of Cost Engineering (AACE) expected accuracy range of -50% and + 100% or \$397.80 million to \$1,591.18 million.

On February 28, 2019, Council approved the recommendation to split the planned NEWPCC Upgrade project into three distinct projects and execute them based on process criticality and available funding. The recommendation to Council requested approval to proceed with the project scope for Power Supply and Headworks Facilities.

Other levels of Government funding for the remaining projects to complete the plant upgrade are required.

The three capital projects and Class 3 cost estimates (including interest charges) to complete the NEWPCC Upgrade are identified as:

- 1. NEWPCC Upgrade: Power Supply and Headworks Facilities \$408 million
- 2. NEWPCC Upgrade: Biosolids Facilities \$553 million
- 3. NEWPCC Upgrade: Nutrient Removal Facilities \$828 million

The total budget to upgrade NEWPCC is approximately \$1,789 million; based on a class 3 cost estimate which has an Association for the Advancement of Cost Engineering (AACE) expected accuracy range of -20% and +30% or \$1,431.2 million to \$2,325.7 million. This amount includes an estimated \$155 million in interest charges to be capitalized during the construction period.

On December 5, 2019, a response was received from Manitoba Conservation and Climate, Environmental Approvals Branch with regards to the Notice of Alteration (NOA) for NEWPCC submitted by the City July 30, 2019. The response indicated that the NOA was not approved and that the City will be out of compliance with the Environmental Act Licence 2684 RRR and with the phosphorus compliance plan pursuant to the Water Protection Act in January 1, 2020. In the absence of an approved phosphorus compliance plan, the City was required to participate in two project committees namely; the Project Steering Committee and Project Advisory Committee.

On September 26, 2019 Council approved a 2019 capital project budget of \$552,712,000, for NEWPCC Upgrade: Biosolids Facilities, subject to final written confirmation of federal and provincial funding satisfactory to the Chief Financial Officer

On January 30, 2020 Council approved \$15,334,000 from the Biosolids Facilities Budget to commence engineering services

#### **RISKS AND RISK MITIGATION STRATEGIES**

There are risks associated with the cost and schedule for a project that is this large and complex especially at the early stages. In addition, the final bid amounts for projects are unknown until the project agreement is finalized with the Design Builder.

In consultation with our engineering advisors, it was necessary to make estimates about the pace of engineering design and the pace of construction. Any delays typically result in increases in cost.

An ongoing risk management strategy has been implemented for both the NEWPCC Upgrade Power Supply and Headworks Facilities Projects. It includes a proactive process of identifying risks, performing qualitative and quantitative risk analyses, creating response plan strategies and ongoing monitoring. The risk management process is an active part of the management of the projects. The projects will also incorporate structured Hazard and Operability Analysis and a Construction Hazard

Assessment Implication Review. Since detailed design and construction will be carried out through a DB contract, the WSTP will be transferring as much risk as reasonable to the Design Builder.

The Risk Registers for each of the Projects contain cost and schedule risks associated with design, procurement, construction, operation and unknown events. The Risk Register is reviewed and updated regularly by the WSTP.

## **Appendix D - Funding**

## North End Sewage Treatment Plant (NEWPCC) and Winnipeg Sewage Treatment Program (WSTP)

1) Funding from other levels of government for the NEWPCC is as follows:

NEWPCC Nutrient Removal Facilities (in \$millions)			Funded to Date		Funding Pending		Total Funding		City Share of
		Total Cost	Canada	Manitoba	Canada	Manitoba	Canada	Manitoba	Costs
Funding Dependent	Power Supply and Headworks Biosolids Nutrient Removal	\$ 408.38 552.71 828.06			120.37 200.87	100.30 167.38	120.37 200.87	100.30 167.38	187.71 184.46
Estimated Program Costs 3		\$ 1,789.15	\$ -	\$ -	\$321.25	267.68	\$321.25	\$ 267.68	\$ 372.17

2) Funding from other levels of government for the Winnipeg Sewage Treatment Programs is as follows:

WSTP All Projects		Funde	d to Date	Funding	Pending Manitoba	Total I	unding	City Share of
(in \$millions)	Total Cost	Canada	Manitoba	Canada	5	Canada	Manitoba	Costs
WEWPCC Biological Nutrient Removal <sup>1</sup> NEWPCC Centrate and UV Disinfection <sup>1</sup> SEWPCC Nutrient Removal/Expansion NEWPCC Power Supply and Headworks <sup>2</sup> NEWPCC Biosolids <sup>3</sup> NEWPCC Nutrient Removal <sup>4</sup>	\$ 33.23 52.08 335.60 408.38 552.71 828.06		\$ 8.19 14.54 15.98	5.30 120.37 200.87	1.10 100.30 167.38	\$ 5.07 5.59 42.34 120.37 200.87	\$ 8.19 14.54 17.08 100.30 167.38	\$ 19.97 31.95 276.18 187.71 184.46
Estimated Program Costs	\$ 2,210.06	\$ 47.70	\$ 38.71	\$326.55	\$ 268.78	\$374.25	\$ 307.49	\$ 700.27

<sup>&</sup>lt;sup>1</sup> WEWPCC Biological Nutrient Removal and NEWPCC Centrate and UV Disinfection have been completed.

<sup>&</sup>lt;sup>2</sup> City Council has approved the NEWPCC Upgrade Power Supply and Headworks project. On September 26, 2019 City Council approved submitting an application for Federal and Provincial funding under the Investment in Canada Infrastructure Program (ICIP). The City is waiting for ICIP application approval.

On September 26, 2019 City Council approved the NEWPCC Upgrade Biosolids project, conditional on Federal and Provincial government funding under the Investment in Canada Infrastructure Program (ICIP). The City is waiting for ICIP application approval.

<sup>&</sup>lt;sup>4</sup> NEWPCC Upgrade Nutrient Removal project has not been approved.

The Provincial government has made funding commitments to date totaling \$182.6 million towards the Headworks and Biosolids projects. Provincial funding received is held in reserve until the ICIP application is approved and project expenditures have occurred.
