Extra Inspections (applied to Commercial-related permits in cases where a re-inspection of a defect is required, fire Prevention inspections and any other commercial additional inspections.) 1 st 2 nd 3 rd and subsequent	\$125 \$250 \$350
Inspection conducted outside office hours – four hours or less –per inspector (base fee)	\$450
Inspections conducted outside office hours – each additional hour – per inspector (in addition to base fee)	\$150

Housing-related permits	Number of inspections included in permit fee (additional inspections will be subject to additional fees)
External electrical permits All other permit types for new construction, additions and renovations (Building, electrical, plumbing, flood proofing permit package)	1 2 building if applicable 2 plumbing if applicable 2 electrical if applicable
Additional Inspections Fees	
Extra inspections 1 st 2 nd 3 rd and subsequent	\$100 \$200 \$300

Note that permits for new single-family and two-family dwellings and additions, the number of inspections included in a project would be 6 (2 each for building, plumbing, and electrical if applicable to the construction project). Since most of the required inspection points can be combined to include more than one permit, the inspections can be ‘transferred’ between permits on these projects.

However, for many interior renovation projects or accessory structure (external to the house) projects which might include more than one permit (e.g. a garage with a building and electrical permit), the inspections would not be transferable because each electrical or plumbing contractor will typically call for inspections independently.

There are two inspections in total per flood proofing permit package.
